Dependable Gage & Tool Co. is a fourth generation family business founded in 1941. We specialize in the design and manufacture of all types of part measuring devices. From simple close tolerance double end plug gages, to extremely complex built-up computer fixture gages, Dependable Gage has the experience necessary to design and build the right equipment to measure your part. Our in-house inspection laboratory is ISO 17025 accredited and our design and manufacturing facility is ISO 9001:2008 accredited.

Our highly skilled workforce allows us to hold extremely tight tolerances, build one-of-a-kind gages, and maintain efficiency. The years of experience in our design and engineering department allows us to create the right gage for the customer's part no matter how simple or complex the requirements. Beyond our quality and expertise, customers return to Dependable Gage because of our first class customer service. There is no computer operated answering system at Dependable Gage. When a customer calls, Dependable takes the necessary steps to fill their needs right away. Our sales and engineering staff is always ready to visit customers facilities and investigate any type of issue that arises. At Dependable Gage the job doesn't stop when the gage leaves our facility, our work comes from our long term face-to-face relationships with our customers. Please give us a call, we would love the opportunity to come out to your facility and discuss any part measurement issues that you have.
